Rooms full of life.

■ PURE LINE

■ COLOURFUL GREY

■ LUXURY AFFAIRS

■ NATURAL STYLE

Nature knows of thousands of tree species. We make our Longlife parquet out of the most beautiful woods.

Shapes, colours, structures – nature is a master of creation. It never repeats itself in its overwhelming diversity and each of its creations is unique. We capture a hint of this in our Longlife parquet. It stylishly integrates into any room with its natural elegance and proves itself to be a true quick-change artist when it comes to shaping an idea into an individual home.

Design your very own living space – for rooms full of life.

Why your gut feeling is our guide.

Why do some people prefer dark floors to light ones? Or large planks to small herringbone? Sometimes the head rules as parquet impresses with its durability. Sometimes the heart rules as this colour once dominated your floors at home in the past. Sometimes the gut dictates and says: That's the one.

We have been helping customers to find "their" floor for many years. We also use our head, heart and gut to develop a range that offers you a large selection of superbly finished surfaces.

It is important that you find a Longlife parquet from us that meets both your desires and your needs. There is only one point that is non-negotiable with us: quality. It simply has to be right.

1

NATURAL
STYLE

Lifelines

Uneven edges, a natural play on colours, tangible life and visible age – accentuated NATURAL STYLE exudes real character at your feet.

2

PURE
LINE

Unadorned

As much as necessary, as little as possible – harmonious to lively surfaces that remain visually close to their raw state due to carefully finishing and enrich the room with their own essence in PURE LINE.

3

COLOURFUL
GREY

Quick-change artist

From shabby chic, to the modern, to country house style, anything is possible – COLOURFUL GREY underlines and accentuates the house's style without dominating it.

Inspiration for themes.

Trends come and go but your parquet is here to stay. It's good if it can adapt to different living styles, because it is rare to find just one style in an apartment or house. Different styles are often mixed, be it harmoniously or with strong contrasts. To offer you the right guidance, we arrange our entire parquet range into themes. Inspired by global living and material trends, these themes illustrate various philosophies in terms of lifestyle, product design and materials.

4

LUXURY
AFFAIRS

Glamour gala

Deep black, snow white, breathtaking gold and shimmering silver. Sometimes just that little bit more is required. Baroque, sensual, opulent – indulge in LUXURY AFFAIRS.

5

NEW
CLASSICS

Spirit of the times

Herringbone and squares interpreted in a lavish, modern way. Turning timeless classics into products that are totally trendy time and time again – because NEW CLASSICS simply never go out of fashion.

6

WILD
MOUNTAIN

Peak performers

Long live comfort but in a modern look please. WILD MOUNTAIN stages rooms with woods that exude fine rusticity with that special Alpine charm.

7

PERFECT
BASICS

Base camp

It doesn't always have to look exceptional but it should always be exceptionally good – lay a solid basis for a feel-good atmosphere in your home with PERFECT BASIC.

NATURAL STYLE. Naturally the best floors.

Nature rocks here!

Anyone who is thinking about getting parquet today wants flooring full of character. High-contrast smoothed cracks and visible signs of ageing invite all the senses to get up close. Floors in NATURAL STYLE bring their own life to any setting.

Award-winning!

Longlife parquet from MEISTER.

Longlife parquet

Longlife parquet is stable, natural, healthy for living, quiet, ecological, energy-saving and easy to clean. Only genuine with this sign.

The MEISTER Longlife warranty

We are so convinced of the quality of our Longlife parquet that we give you a Longlife warranty on it. You receive a floor from MEISTER, which will even impress with its valuable look, high resistance and easiness to clean in many years time.

Warranty according to the MeisterWerke warranty conditions at www.meister.com

The Blue Angel

The result of our responsible choice of materials and modern production processes is that all MEISTER floors carry the Blue Angel – the world's first and most well-known award for environmentally friendly products and services. This means you can be sure you are choosing a low-emissions, ecological floor.

FSC® label

The Forest Stewardship Council, in short FSC®, is an international non-profit organisation that is committed to exemplary forest management. It is supported among others by renowned environmental organisations such as Greenpeace, NABU and WWF. The FSC® label is only carried by products that originate from forests managed in an exemplary fashion and from other controlled origins. Take a look at the FSC®-certified products in this catalogue.

Real Wood

Naturally authentic: With our Longlife parquet you are bringing the authenticity of a natural wood surface into your home.

General building supervision permission

Granted by the German Institute for Building Engineering (DIBt).

CE mark

MEISTER Longlife parquet complies with all European health and safety regulations.

MADE IN GERMANY

We are firmly rooted in our location and see it as much more than just the name of where we come from. For us, "Made in Germany" also means top quality standards. It is our daily challenge to meet these.

Welcome to MeisterWerke.

We have been passionately developing and making products for rooms full of life for many years. At our company headquarters in Rütten-Meiste, in the beautiful region of Sauerland, it is our daily challenge to perfect these and therefore ensure the greatest benefit for our customers.

Our love of innovation is evident in everything: in our huge range, in our company and in the way we work together. Always collaboratively and fairly but also purposefully and reliably. Our company motto is: a MeisterWerke masterpiece every day!

As a family-run company we also think about future generations. That's why respect for nature and natural resources is a matter of course for us. We place great importance on environmentally sound origin and short transport routes when choosing our materials. Independent test institutes verify that the materials used are harmless. Resulting in products that combine top quality, maximum comfort and a great feeling year after year. For your rooms full of life.

MEISTER

Innovative products and system solutions are always the result of teamwork at MeisterWerke.

The careful selection of materials and decor guarantees the best result.

Our products undergo extensive quality tests on their way to becoming the perfect interior design object.

Link to MeisterWerke:
www.meisterwerke.com

Stable

thanks to the extremely resistant HDF middle layer

This is the most important reason why we only produce our floors with a HDF middle layer: the press-in behaviour. The extremely dimensionally stable and high quality HDF base board stabilises the covering layer, making it extremely tough and resistant towards pressure.

MEISTER parquet with HDF middle layer

Parquet with spruce middle layer

Noise reducing

as a result of its own high weight

Greater mass produces less vibrations. Thanks to the use of HDF as a middle layer, the own weight of the installed area significantly increases. This has a positive effect on room noise and walking noise properties.

Easy to install

thanks to the patented Mastercllic Plus click system

The Mastercllic Plus locking system means fast installation with automatic end connection system. The homogeneous HDF middle layer allows a precise profile geometry to be milled without any splinters. This guarantees comfortable and smooth installation as well as permanent joint closing.

Healthy living

thanks to the use of natural materials

Parquet is a natural product. It regulates humidity and ensures a healthy living climate. The flooring is particularly hygienic thanks to it being easy to clean and maintain. All materials are selected carefully and are subject to regular tests in our labs.

+ + + + Longlife parquet – and real wood stays beautiful for longer.

Live and let live with MEISTER Longlife parquet nothing is easier than that. With traditional professional care, a great deal of sensitivity, many years of experience and comprehensive technical knowledge we ensure that flooring is made out of a valuable natural product that makes life easier and more beautiful. On this and the following pages you can learn about the many details that as a whole account for the unique quality of our Longlife parquet.

Ecological

thanks to the use of 2.5mm covering layers that save resources

MEISTER parquet actively contributes to environmental protection. As a result of the perfect combination of the 2.5mm wear layer and the special HDF middle layer, only roughly a tenth of wood, a valuable resource, is required to produce MEISTER parquet, compared to a solid wood floor.

Energy-saving

thanks to low thermal resistance

With a floating installation, the floor covering on top of a hot water underfloor heating should also not exceed the limit of 0.15m² K/W laid down by regulations* in order to quickly transport the heat supplied to the surface.

* Federal Association of Surface Heating and Surface Cooling.

Variety

thanks to the extensive range on offer

The combination of plank formats, types of wood, structures as well as surface looks and finishes provides a wide selection for specific customer requirements.

Over 190 different products!

Awarded

with recognised quality seals and certificates

Many recognised certificates and quality seals attest to the high quality of MEISTER parquet. They also verify our commitment to sustainable production in Germany. Our awards show you that you can trust in floors with superb qualities in your living areas.

The mark of responsible forestry

MEISTER

Uniclic

The proven pre-tension system ensures a lasting, secure joint lock at both ends (with the PS 400 collection).
We have replaced the Uniclic connections at the ends with our own Masterclik Plus development in a number of our collections.

Quadroclik

This click technology is used with the PQ 500 collection. It makes installation easier and the connections durable and secure.

Masterclik Plus

The patented system for fast laying and secure connection. With the exception of the PD 550 collection that is glued at the end, the unique combination of the non-adhesive Masterclik Plus click system works as follows:

- Masterclik Plus end connection**
- 1 | The flooring is lowered right next to the neighbouring plank.

This is what parquet is like nowadays: convenient laying, intelligent structure, perfect formats.

MEISTER Longlife parquet not only plays its most beautiful assets in material and appearance but the incredibly easy installation, large selection of formats and sophisticated product structure also impress.

2 | After lowering, the flooring is not yet locked at the ends.

3 | The tongue is only activated when the next row is laid.

4 | This results in a secure connection.

Product structure

Two things give MEISTER floors their amazingly long life: the high quality, carefully selected materials and the intelligent multi-layer structure. Together with the dimensionally stable HDF middle layer used by us, this guarantees you a resistant floor that remains beautiful over many years. The *Weartec®Nature*, *Weartec®* and *Duratec Plus* surface finishes emphasise the character of the respective woods using high quality oils, waxes or varnish and ensure durable, easy to clean floors. MEISTER Longlife parquet is suitable for laying on subfloors with controlled hot water underfloor heating.

Longlife parquet 3-layer product structure

Weartec®Nature surface

Natural oils and waxes penetrate deep into the wood and form a protective, breathable surface. This form of finish emphasises the grain as well as the structure, regulates humidity and ensures a healthy living climate.

Weartec® surface

The UV-hardened oil surface with special basic treatment applied at the factory ensures a very natural appearance.

Duratec Plus surface

7-layer seal with formaldehyde-free, viscoplastic and UV-hardened acrylic varnish. This varnish is ecologically non-harmful and extremely durable due to its special composition.

Wood wear layer

Made from 3.6 or 2.5mm wood.

Middle layer

Special glued HDF middle layer for simple installation, shape stability and increased resistance to impressions.

Backing

Made from Nordic spruce veneer for optimum strength.

Plank formats

Our Longlife parquet has real format – from the room-sized 1-strip plank over four metres long to the fine herringbone strip of 50 centimetres. And in between? There is still plenty of room for your ideas with planks in lengths between 1.18 and 3.65 metres as well as widths between 10 and 26 centimetres.

Link to Installation instructions:
www.meister.com/en/service/service-center/installation-and-care-instructions.html

11 Parquet gradings with character. **It's your choice.**

Are you fascinated by raw power? Are you impressed by fine grain? Or is it an expressive mix that inspires you? As a living piece of nature, no plank is the same as any other, each single one is characterised by its structure, play on colours as well as surface treatment and finish. Resulting in different looking floors that significantly shape the overall impression of a room. Our Longlife parquet in eleven gradings opens up a whole variety of options for you to find the most beautiful basis for your home.

Harmonious

It's all about the natural mix: For the "harmonious" grading we choose woods with a calm look as well as a balanced and natural play on colours. They contain a few tightly intergrown knots and brownwood and do not have any sapwood. Occasional, professionally filled knot holes may appear in the PD 450 collection.

Ambience

For a calm overall look: Planks in this grading have a natural play on colours with a few small knots. Sapwood and slight cracks ensure the balanced interplay between liveliness and elegance.

Lively

In this grading we deliberately offer surfaces with strong colours and structures, which emphasise the wood's natural character. Healthy knots, sapwood and brownwood are part of the overall lively image. Our oak planks and oak maxi strips do not have any sapwood. Knot holes are professionally filled.

Longlife parquet is a natural product. Therefore differences in colour and structure are an expression of its authenticity. Wood is subject to typical changes in colour when exposed to direct sunlight. Depending on the intensity and light effect, light woods get darker or a yellow tinge. Darker woods get lighter.

Accent

Similar to the "lively" grading, we also use woods with a strong play on colour and structure here. Healthy knots, sapwood and brownwood accentuate the wood's natural character. Special accents are created here by the individually filled and unevenly marked cracked knots.

Distinctive

An interesting, powerful play on colours and structures emphasises the distinctive character of this floor. Sapwood and brownwood as well as distinctive knots and occasional cracks define the floor's impressive appearance. Cracked knots and cracks are professionally filled.

Vital

Real woods with a distinctive play on colour and structure provide the basis for this grading. Larger knots and occasional cracks enhance the overall lively appearance. There is no sapwood with this grading. Cracked knots and cracks are professionally filled.

Mountain

Based on the "distinctive" grading with its strong colours and structures, more sapwood and brownwood and distinctive knots, all cracked knots and cracks are individually filled and unevenly marked.

Authentic

Based on the "vital" grading, cracked knots and cracks are individually filled and unevenly marked here. This lends the laid floor a natural, really lively appearance.

Rustic

In this grading we deliberately offer surfaces with strong colours and structures, which emphasise the wood's natural character. Larger knots, occasional cracks and sapwood are part of the overall rustic image. Cracked knots and cracks are professionally filled.

Country

Real woods with a distinctive play on colour and structure form the basis for this grading. Larger cracked knots and occasional cracks that are individually filled and unevenly marked accentuate the overall lively image. Together with the unevenly produced joint patterns between the individual strips and on the planks a really impressive surface results.

Canyon

In this grading, oak surfaces with a really special overall rustic impression and distinctive play on colours and structure are used. The natural and raw character of the floor is emphasised by larger knots and varying degrees of cracks, which are individually filled and unevenly marked.

Wood is elegant, beautiful and also good for every day life.

Wood is a valuable, natural resource that we transform into something really special with total respect and a sensitive touch. Our surface finishes with high quality oils or varnishes accentuate the respective wood's character and provide permanent protection. Special finishing methods, such as the brushing, liming and smoking of woods, make it even more expressive. Modern looks such as 3D, timber structure, rough grain look and saw-cut structure set real trends. MEISTER Longlife parquet stands for unique floors that combine beauty, durability and easiness to clean of the highest standard.

Naturally oiled – Weartec®Nature

Natural oils and waxes are the basis for our Longlife parquet's naturally oiled surfaces. *Weartec®Nature* penetrates deep into the wood and forms a protective, breathable surface. This kind of finish creates a natural appearance with subtle brilliance, emphasises the grain as well as structure, regulates humidity and ensures a healthy living climate. All Longlife parquet floors with *Weartec®Nature* finish are treated ready for residential use and do not have to be treated with oil after installation. However, the naturally oiled surface does require a regular polish, which gives the floor a natural shine and ensures exceptional resistance. If required, it can be re-oiled and partly refinished without any sanding down.

UV-hardened oil surface protection

Our UV-hardened oil really brings out the best in many types of wood. It receives a warm, natural look from this. The *Weartec®* surface is a high quality UV-hardened oil surface with a special basic treatment applied at the factory. The floor is treated ready for residential use, is similarly easy to clean to varnished parquet flooring and therefore does not need to be re-oiled.

Varnish finish

Our Longlife parquet's *Duratec Plus* natural matt varnish or high-gloss varnish is extremely durable, easy to clean and naturally environmentally friendly, as it does not contain any solvents. The Plus stands for our seven-layer Duratec varnish structure. The mixture of varnishes in the individual layers and their order takes into account that parquet floors may possibly be sanded down. The entire composition consists of a formaldehyde-free, UV-hardened and ecologically non-harmful acrylic varnish. As a result *Duratec Plus* provides an easy to clean and durable parquet surface.

Limed wood

Liming emphasises the grain of the wood and gives it an attractive surface. Here a lime paste is then applied after brushing. Once it is dry, any residue is removed and the surface is coated with natural oil, UV-hardened oil or natural matt varnish. Oakwood is particularly ideal for liming as a result of its large pores.

Brushed wood

Here surfaces are put through a special production step where the real wood wear layer is brushed. The resulting relief deliberately accentuates the rustic effect and may, depending on the homogeneity of the natural wood, differ on one plank or from plank to plank.

Colour treated wood

Some surfaces, for example white beech, white oak, antique grey oak and white ash, are produced using pigmented varnishes or oils. This gives planks their special colour and at the same time maintains the wood's natural structure. As with liming, the surface is finally coated with natural oil, UV-hardened oil or varnish.

Smoked wood

Through smoking the tannin in wood reacts so that the wood permanently changes colour into brown, dark brown or even black. A lighter brown shade results if the chemical process is reduced. The differences in colour on individual planks and from plank to plank caused by the varying tannin content in the wood is what distinguishes this natural product.

Thermally treated wood

Thanks to thermal processes the wood becomes virtually odourless and increases its shape stability. The wood gains a consistently even warm reddish brown colour with a special intensity due to a very strong brushing. When exposed to sunlight, thermally treated woods tend to lighten, which emphasises their naturalness.

Planked look

In complex production processes, uneven cracks and joints, which are similar to those in a decade old wooden floor, are worked into the surface to accentuate the wood's unspoilt character.

Rough grain surface

This individual surface finish produces a unique wave-like structure for a special tactile experience.

Timber structure

A number of different process steps is required to achieve this very special and unique structure of rustic finished wood.

Saw-cut structure

With Longlife parquet with saw-cut structure, saw cuts run across the grain. They are clearly visible and tangible and are extra emphasis is added visually by the matt gloss surface finish.

Used-Look

This surface finish gives our Longlife parquet an antique look. Thanks to elaborate handwork combined with modern technology the planks obtain different looks and appear naturally aged.

3D structure

We achieve this unique 3D plank look that gives the floor its very special appearance using varying thickness in the covering layer and intensive brushing. The minimal height differences between the singular strips do not have any impact on the floor's everyday suitability.

For the perfect finish – details that simply match.

1

Universal profiles

The professional and proven installation solution for transitions, ends and expansion joints.

2

Universal stair profiles

Stairs with MEISTER floor elements can be easily covered with matching profiles.

3

Skirting boards

Three selected profiles to match all the decor/wood shades in the parquet, cork and laminate flooring range provide the perfect finish.

4

Skirting boards

These modern square-shaped skirting boards are available in many surfaces. Skirting boards coated in a white film which can be painted by the customer in any colour you like.

5

Hamburg skirting boards (not allocated)

The elegant classic among skirting boards can be combined with any floor.

6

Under lay material (not allocated)

High-performance range of insulating underlay for effective sound absorption in the room and the reduction of footfall transmitted to rooms below.

7

Ceiling edging

Three different ceiling edging profiles guarantee clean edging for walls and ceilings.

Link to Mouldings:

flooring-accessories/mouldings.html](http://www.meister.com/en/accessories/flooring-accessories/mouldings.html)

A perfect living atmosphere results when all the elements in a room are perfectly coordinated to one another. These include, for example, mouldings that match the floor or panels for attractive joints or special profiles for successful room transitions. Lights can also contribute a great deal to the room atmosphere with their individual light effects. We also offer you suitable care products so that you can enjoy your floor for a long time after installation.

- 8** **Corner mouldings**
Perfectly coordinated special mouldings, e.g. large corner mouldings for many corners, angles and edges.

- 9** **LED recessed lights**
Our recessed lights, such as FLAT Quadro, are ideal as orientation lighting and impress with their compact dimensions.

- 10** **LED panel lights**
To match wall and ceiling installations and ideal for indirect lighting or creating accent lighting.

- 15** **Care products** (not allocated)
The range of care products are specifically for cleaning MEISTER floors.

- 14** **Attachment lights**
The lights offer the option of choosing between warm white or bright clear light.

- 13** **Recessed lights**
The modern lighting range with its LED; low voltage and high voltage lights offers plenty of creative possibilities to create effective room and accent lighting.

- 12** **Shelving rails**
If the SP 400 system panel elements are assembled with a live aluminium rail, they can be fitted with decorative lights, e.g. glass floor lights.

- 11** **Glass floor lights**
Decorative and atmospheric accent lighting can be fitted to the SP400 system panel shelf inserts using glass floor lights.

Beautiful and also intelligent? It is possible!

It could be easy to lose track of the many excellent properties our MEISTER Longlife parquet have – but you don't have to. We have allocated coloured symbols to our floors, which highlight the most important product properties and make it easier for you to find your way around.

				
	Stable thanks to the extremely resistant HDF middle layer	Noise reducing thanks to its own high weight	Healthy living thanks to the use of natural resources	Ecological thanks to the use of 2.5mm covering layers that save resources

MEISTER

Every day a masterpiece

We have been impressing with innovative products, practical system solutions and attractive designs for more than 80 years. We are constantly developing ourselves, our company and our range. As we know: you expect the best all the time. And that's what we want to give you.

MEISTER is committed to its location.

We think internationally but remain a German company – 640 employees guarantee Made in Germany premium quality day in day out.

MEISTER is a leading innovator.

Intelligent ideas make us the driving force behind the industry – over 200 patents and registered designs are impressive evidence of this.

MEISTER accepts responsibility for the environment.

We act sustainably in all areas – careful product selection protects resources and the climate.

MEISTER stands for specialist retail.

We focus on reliable partnerships with specialist retail and specialist trade – our "100 PRO Producer/Dealer/Craftsmen" network guarantees first-class products, professional advice and expert assembly.
